ROCKY VIEW COUNTY

COCHRANE LAKE IMPROVEMENT PLAN PROJECT

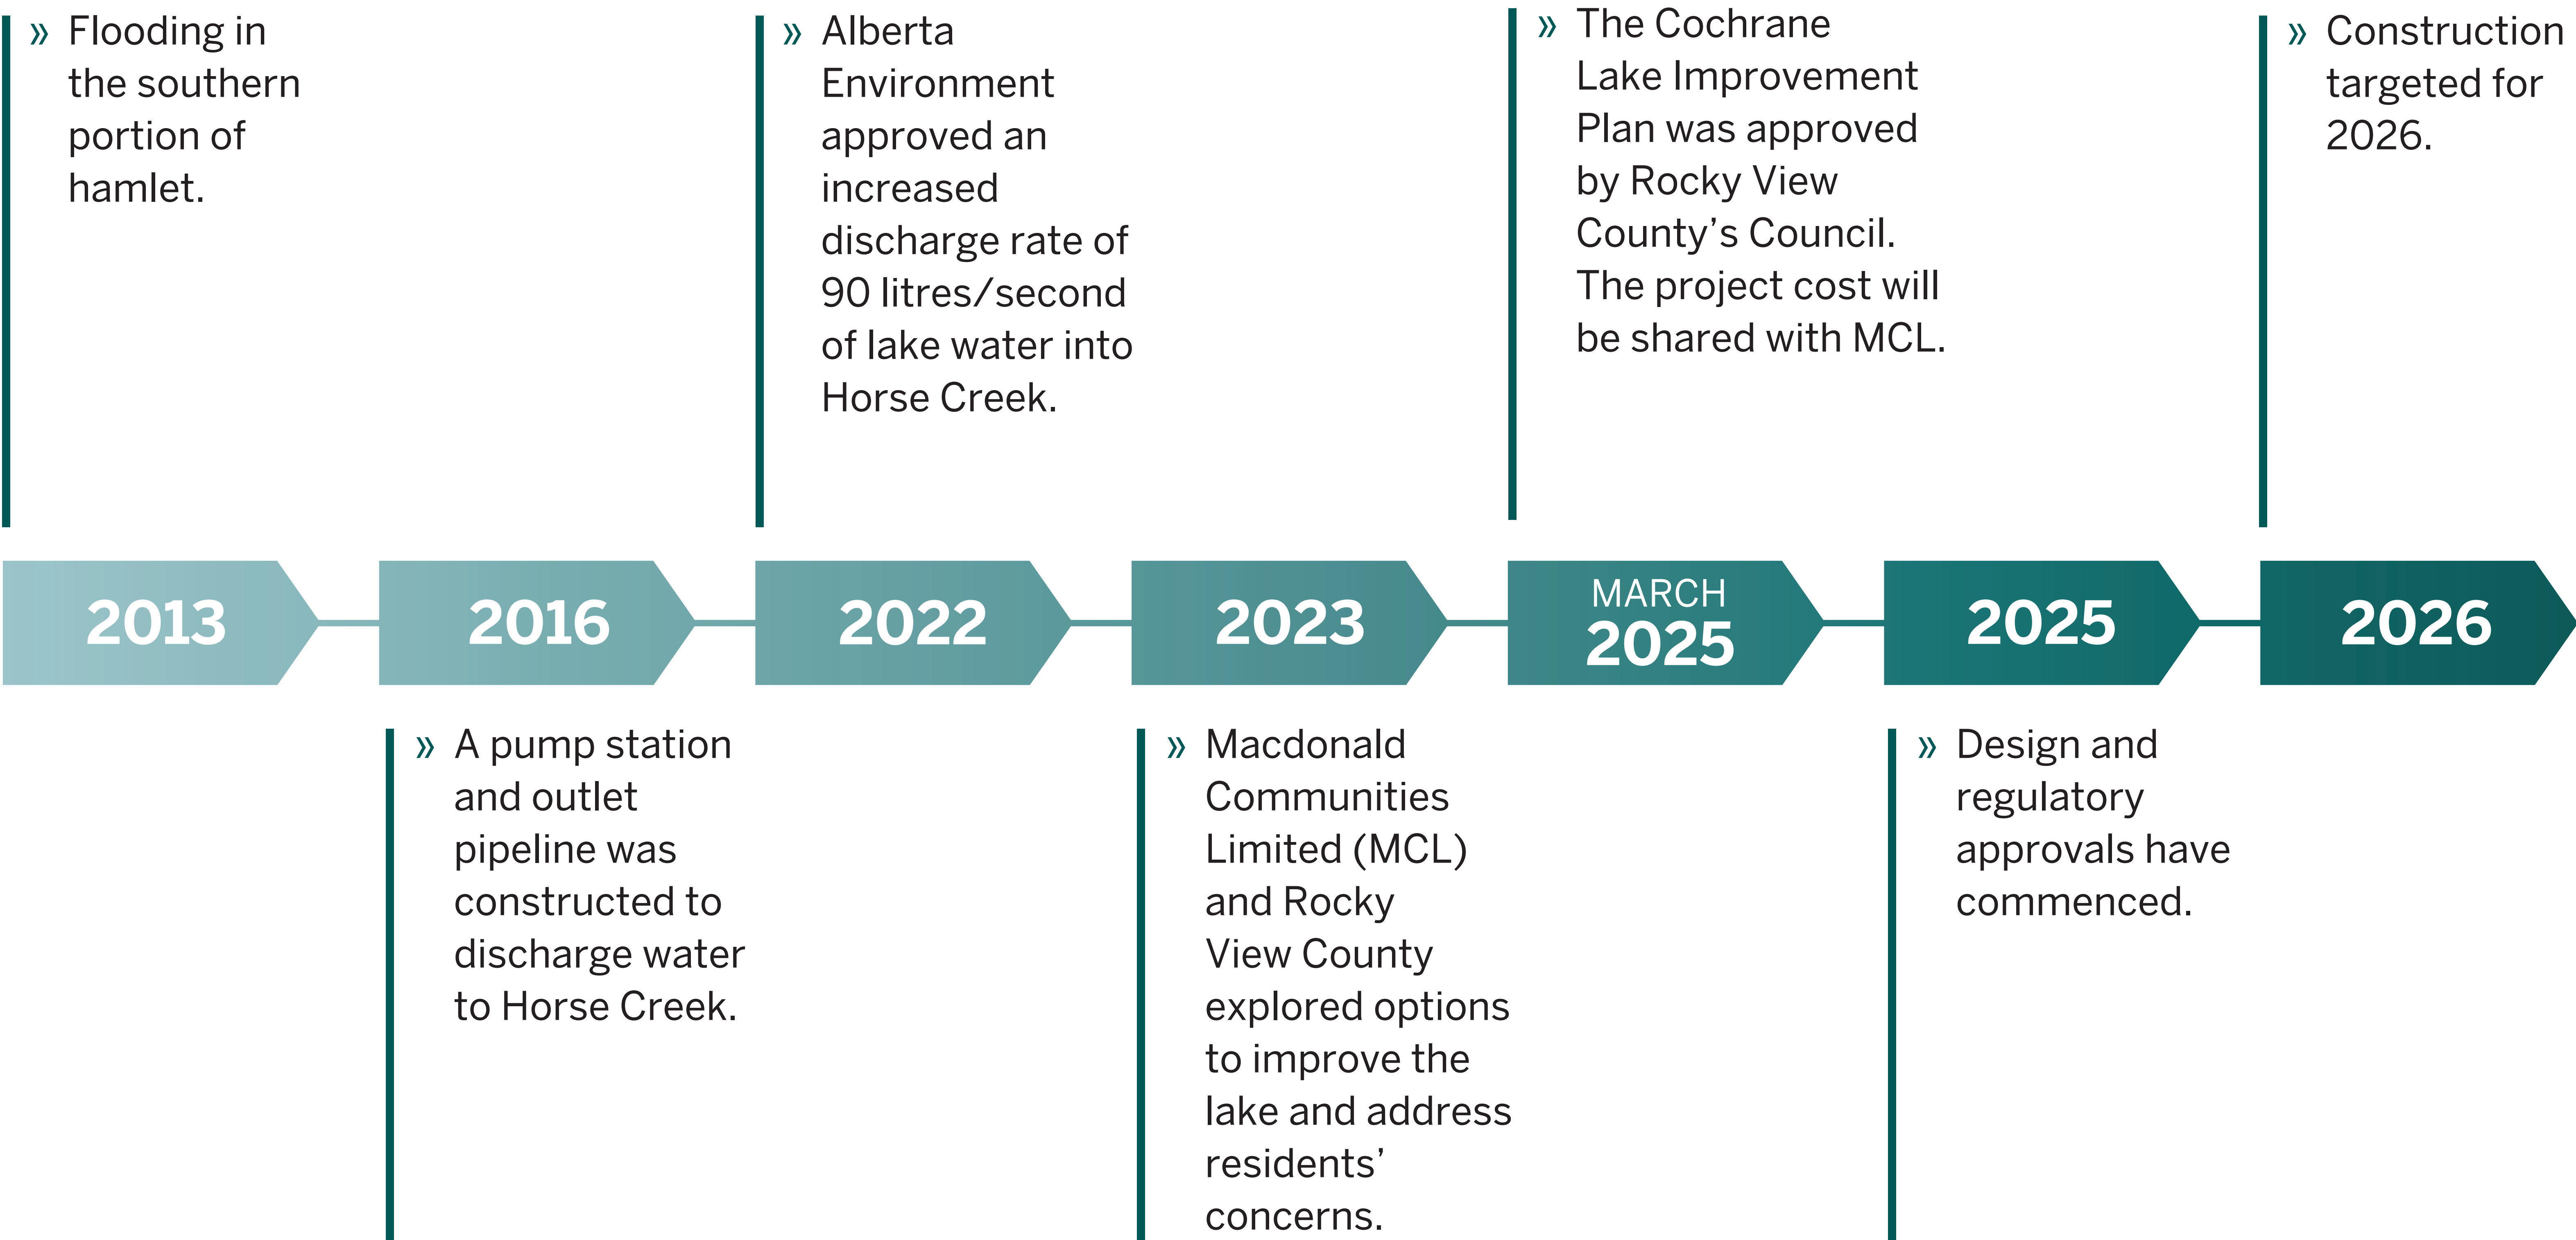

The community has identified flooding, water quality and odour as concerns to be addressed.

Cochrane lake is a natural stormwater collection pond.

In Alberta, the Crown (the province) owns the beds and shores of all permanent, naturally occurring lakes (i.e., Cochrane Lake), rivers, and streams. This ownership is established under the *Public Lands Act*.

TIMELINE

PROJECT GOALS

- » **Manage the lake** so it can rise and lower without impacts to residents.
- » **Improve the lake** water quality.
- » Add **pathway connectivity**.
- » Maintain and **protect the natural environment**.

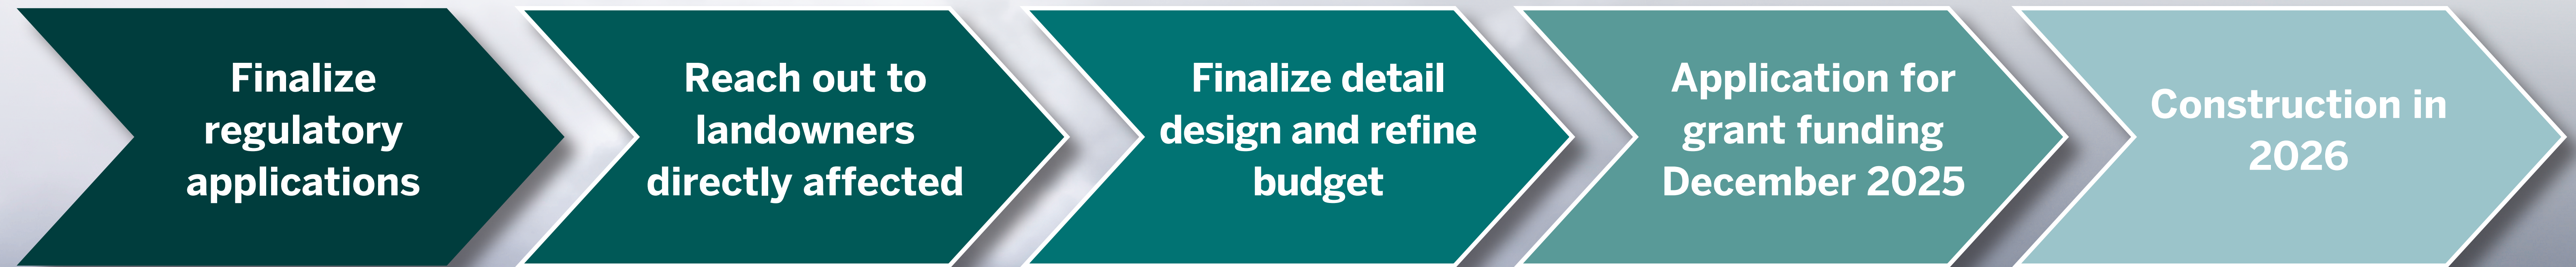

SOLUTIONS TO IMPROVE THE LAKE

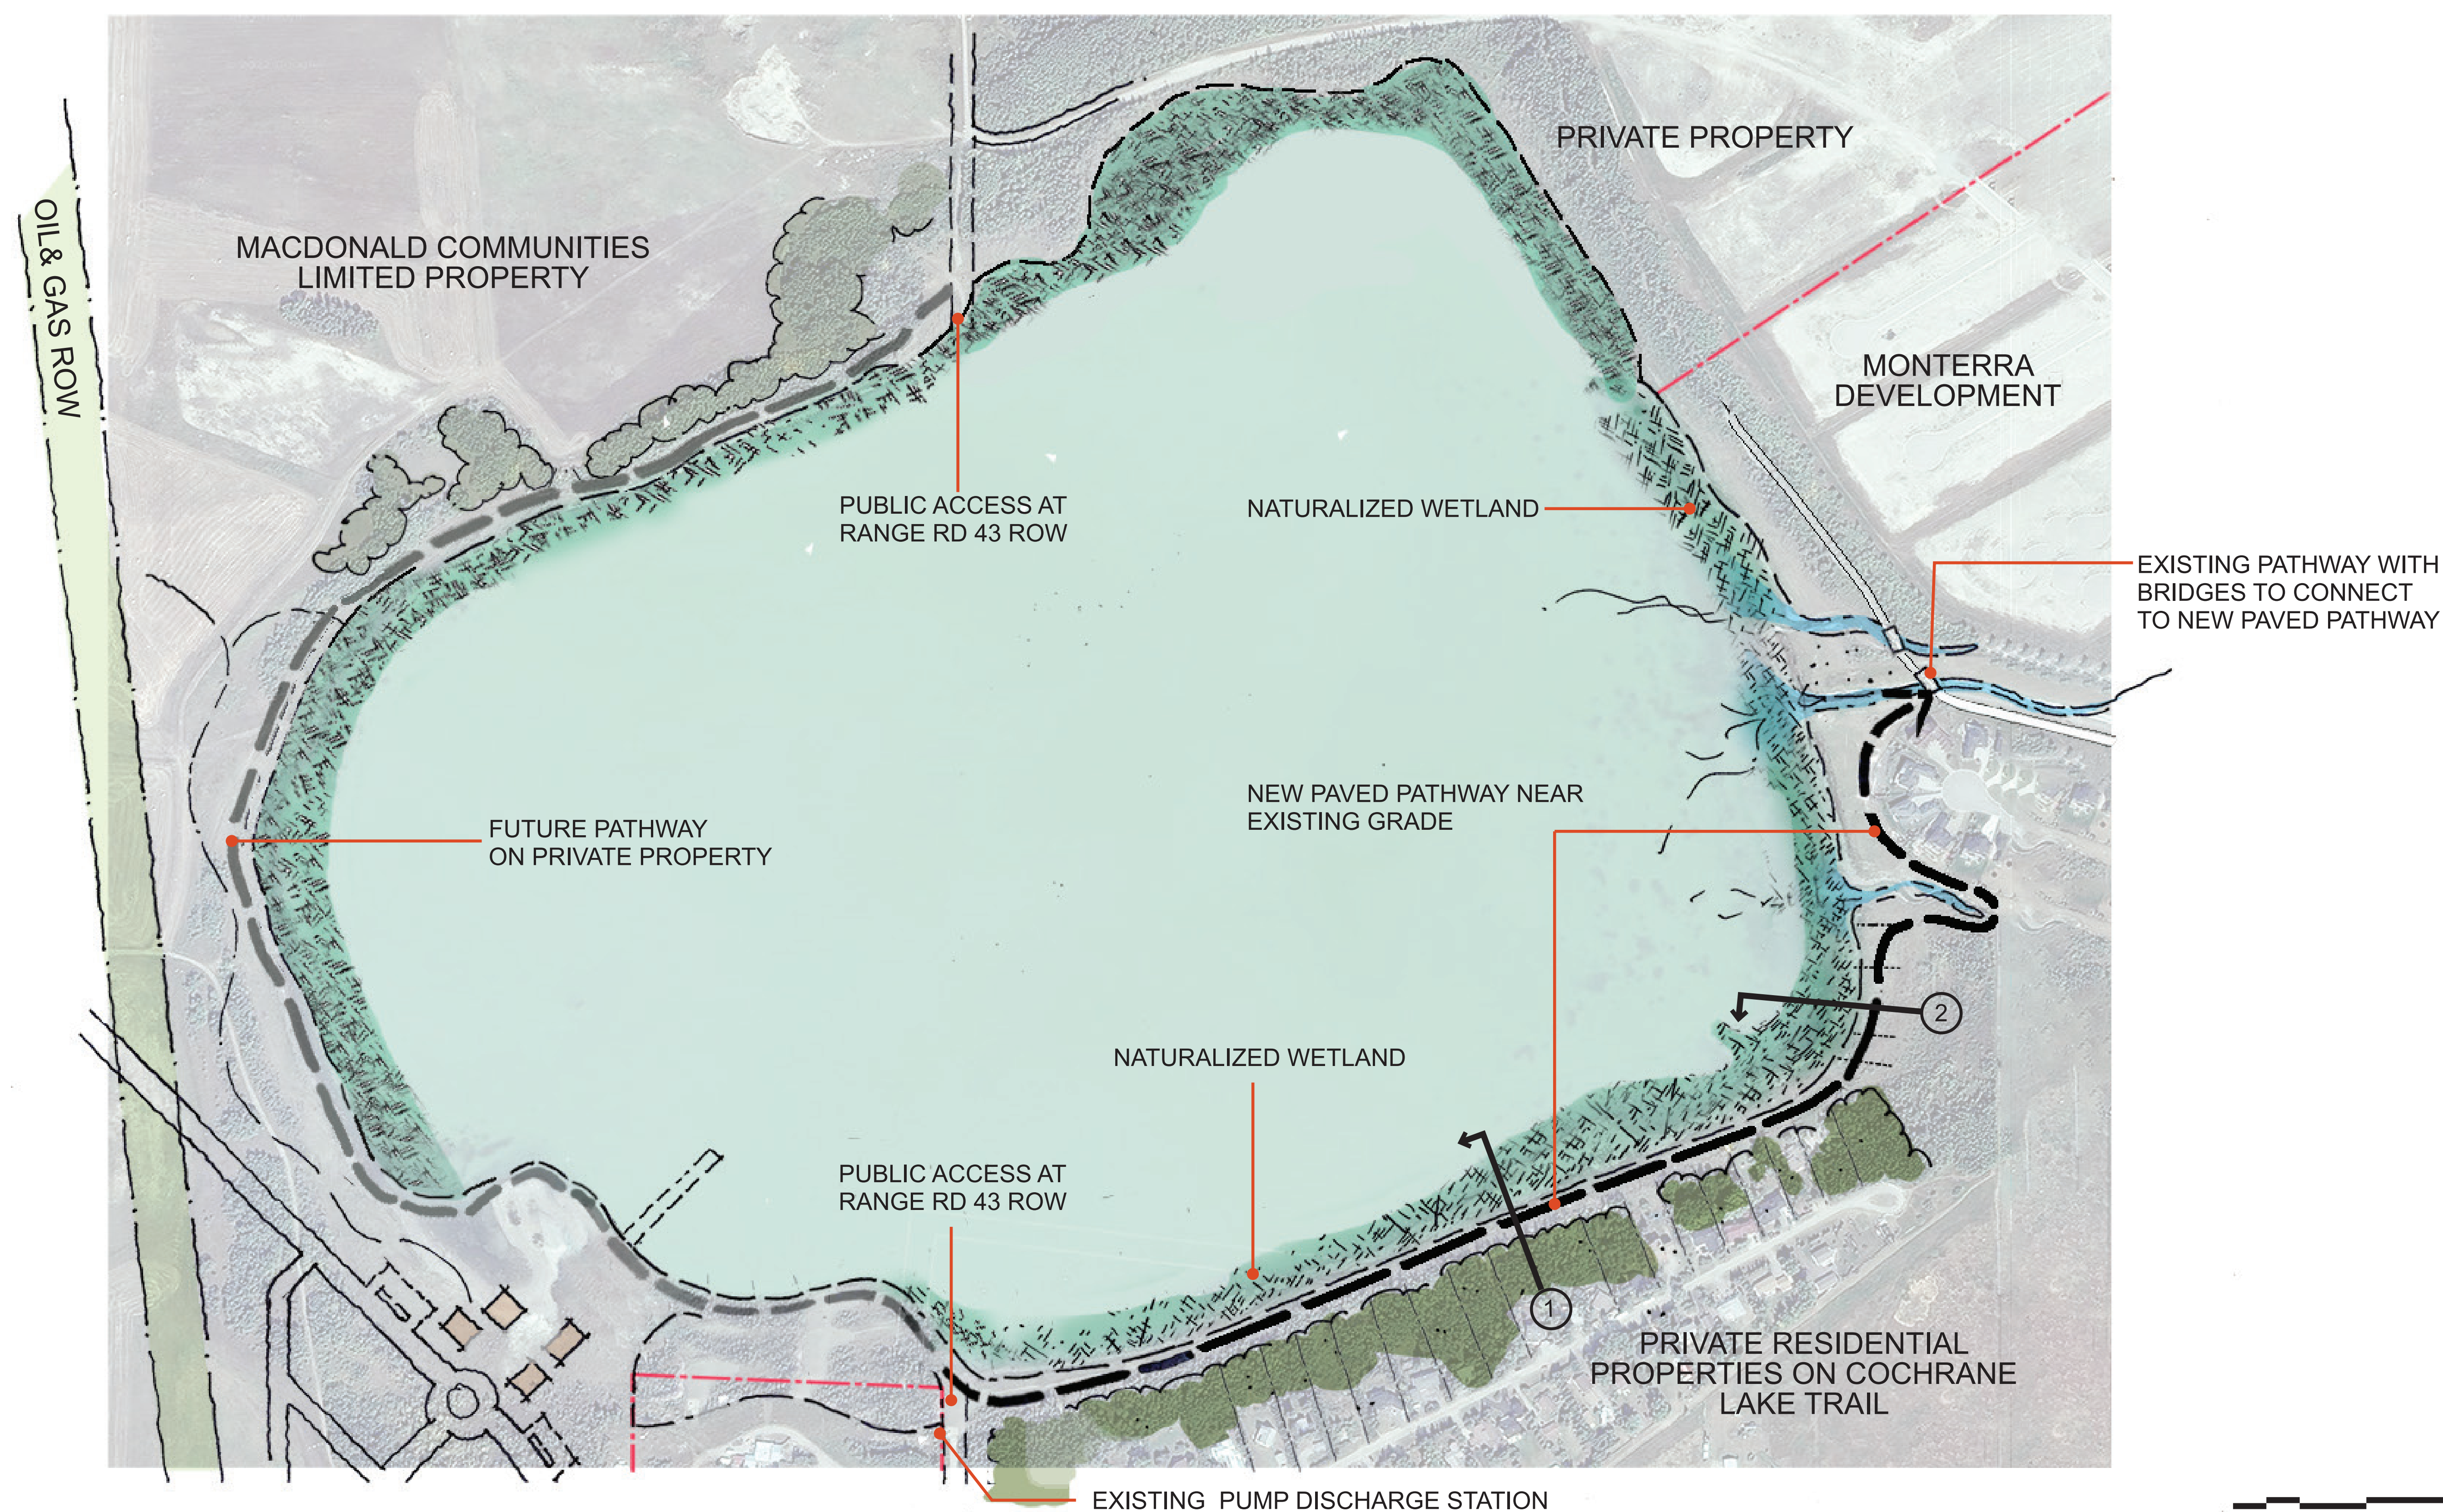

- » **Adding an inlet to the lake** to bring raw water from the Bow River to improve water quality and circulation.
- » **Construct a pathway** around the lake in lieu of a berm, to provide opportunities for recreation, exercise, and transportation.
- » **Upgrade to the discharge pump** to increase outflow into Horse Creek from 90 L/S to 150 L/S.

PROJECT NEXT STEPS
