## 11. PART A – REDESIGNATION APPLICATION REQUIREMENTS

### Redesignation applications preceded by an earlier application:

In many instances, a redesignation application is preceded by one or a number of applications which affect the development of land, set the higher-level strategic intent associated with amendments to Area Structure Plans or the adoption of Local Plans (Conceptual Schemes and Master Site Development Plans). In these cases, there are a range of technical documents which may have already been required and provided.

Owing to the passage of time between applications, the introduction of new policy or new technical standards, updated versions of previously provided technical reports may be required. Preceding applications may have introduced requirements or expectations for further technical reports to be provided as part of redesignation applications. These matters should be addressed accordingly.

The application checklist herein is a general list of the technical reports required as there may be occasions where additional information is required.

## 11. PART A – REDESIGNATION APPLICATION REQUIREMENTS (continued)

1. **Boundary Realignment/Adjustment:** Additional technical studies for a boundary realignment application is not typically required unless the proposal significantly reduces the size of one of the parcels that is subject of the application, such that technical considerations need to be addressed. For example, a residential lot is reduced in size as a result of redesignation and boundary realignment that demands a higher level of proof for servicing. The County reserves the right to request additional technical reports if it is considered that previous servicing (including wastewater, stormwater, traffic and water supply) arrangements are insufficient.
2. **All information provided with this application is available for public review and comment.**
3. The relevant Authority (Subdivision or Development) at subdivision or development permit stage:

  - f) Will determine any oversizing requirements for services and infrastructure required to be constructed as part of the proposed development. The County will determine Cost Recovery arrangements through preparation and execution of documents prior to endorsement of a plan or survey for registration.
  - g) Will determine any outstanding municipal reserve dedications, cash-in-lieu payments or deferrals where applicable.
4. *Technical reports* are defined as report of any information regarding a matter identified in the MGA, Subdivision and Development Regulations, Statutory Plan, County Policy, Servicing Standards or Bylaw.
