

PUBLIC NOTICE

Environmental Protection and Enhancement Act NOTICE OF APPLICATION

In accordance with the *Environmental Protection and Enhancement Act* (EPEA), Rocky View County has applied to Alberta Environment and Parks for a renewal of an existing Langdon wastewater approval.

The Langdon wastewater system consists of a wastewater collection system in the Hamlet of Langdon and in the eastern portion of the Rocky View County, a wastewater treatment plant located in the Hamlet of Langdon at 507 Railway Avenue NE in the SE 23-23-27-W4M and a treated wastewater outfall to the Weed Lake.

The renewal application doesn't propose to change the treatment capacity of 5,300 cubic metres per day and the current treatment limits. The wastewater treatment plant consists two sequencing batch reactor (SBR) trains and one moving bed biological reactor (MBBR) train followed by ultraviolet disinfection. The Langdon wastewater treatment plant is designed to control the amount of micro-organisms, organics, nitrogen and phosphorus in the treated wastewater released to the Weed Lake. Water from Weed Lake is released to the Western Irrigation District system that ultimately drains to the Red Deer River.
