Dear Resident(s) of the Hamlet of Conrich,

Rocky View County recently received information that the Conrich Water System is now certified by the Fire Underwriters Survey (FUS) and qualifies for fire insurance grading recognition. The Conrich water distribution system services the Hamlet of Conrich includes the Canadian National (CN) Railway development, Cambridge Estates, and Prince of Peace residential developments. This certification of fire hydrants is great news. As a homeowner, you can take the included letter to your insurance broker for review with your insurance policy. Other factors that may be considered include the recommended fire insurance grade to be applied at a specific location in Rocky View County based on fire station response distance and recognition of water supply/hydrant.

Fire insurance grading recognition will be published within the Canadian Fire Insurance Grading Index and details will be visible within one to two months of the date of this letter. Property owners are recommended to review this with an insurance broker within this two-month period.

If you have any questions, you are welcome to reach out to the Utility Services Department at questions@rockyview.ca or 403-230-1401. Additional information regarding drinking water services within the County is available at rockyview.ca/drinking-water.

Sincerely,

Utility Services
